

Annular light beams induced by coupling a dissipative spatial soliton on the top of a sharp external potential

Y. J. He, D. Mihalache, and B. B. Hu
J. Opt. Soc. Am. B **27**, 2174-2179 (2010)

Collapse of ultrashort spatiotemporal pulses described by the cubic generalized Kadomtsev-Petviashvili equation

H. Leblond, D. Kremer, and D. Mihalache
Phys. Rev. A **81**, 033824 (2010)

Collisions between discrete spatiotemporal dissipative Ginzburg-Landau solitons in two-dimensional photonic lattices

D. Mihalache, D. Mazilu, and F. Lederer
Cent. Eur. J. Phys. **8**, 77-86 (2010)

Discrete Ginzburg-Landau spatiotemporal optical solitons: collision scenarios

D. Mihalache
Rom. Rep. Phys. **62**, 697-709 (2010)

Discrete light bullets in one- and two-dimensional photonic lattices: collision scenarios

D. Mihalache
Rom. Rep. Phys. **62**, 99-114 (2010)

Elliptic vortices in optical waveguides and self-attractive Bose-Einstein condensates

F. W. Ye, L. W. Dong, B. A. Malomed, D. Mihalache, and B. B. Hu
J. Opt. Soc. Am. B **27**, 757-762 (2010)

Exact solutions of the Gross-Pitaevskii equation for stable vortex modes in two-dimensional Bose-Einstein condensates

L. Wu, L. Li, J. F. Zhang, D. Mihalache, B. A. Malomed, W. M. Liu
Phys. Rev. A **81**, 061805 (2010)

Few-optical-cycle dissipative solitons

H. Leblond and D. Mihalache
J. Phys. A-Math. Theor. **43**, 375205 (2010)

Formation and stability of light bullets: recent theoretical studies

D. Mihalache
JOURNAL OF OPTOELECTRONICS AND ADVANCED MATERIALS **12**, 12-18 (2010)

Generation of arrays of spatiotemporal dissipative solitons by the phase modulation of a broad beam

Y. J. He, B. A. Malomed, D. Mihalache, F. W. Ye, and B. B. Hu
J. Opt. Soc. Am. B **27**, 1266-1271 (2010)

Models for few-cycle optical solitons

H. Leblond and D. Mihalache
JOURNAL OF OPTOELECTRONICS AND ADVANCED MATERIALS **12**, 1-5 (2010)

Soliton drift, rebound, penetration, and trapping at the interface between media with uniform and spatially modulated nonlinearities

Y. J. He, D. Mihalache, and B. B. Hu
Opt. Lett. **35**, 1716-1718 (2010)

Spatiotemporal solitons in the Ginzburg-Landau model with a two-dimensional transverse grating

D. Mihalache, D. Mazilu, F. Lederer, H. Leblond, and B. A. Malomed
Phys. Rev. A **81**, 025801 (2010)

Spatiotemporal vortex solitons in waveguide arrays

H. Leblond, B. A. Malomed, and D. Mihalache
JOURNAL OF OPTOELECTRONICS AND ADVANCED MATERIALS **12**, 6-11 (2010)

Stable topological modes in two-dimensional Ginzburg-Landau models with trapping potentials

D. Mihalache, D. Mazilu, V. Skarka, B. A. Malomed, H. Leblond, N. B. Aleksic, and F. Lederer
Phys. Rev. A **82**, 023813 (2010)

Subwavelength plasmonic lattice solitons in arrays of metallic nanowires

F. Ye, D. Mihalache, B. Hu, and N. C. Panoiu
Phys. Rev. Lett. **104**, 106802 (2010)

Three-dimensional Ginzburg-Landau dissipative solitons supported by a two-dimensional transverse grating

D. Mihalache
PROCEEDINGS OF THE ROMANIAN ACADEMY SERIES A-MATHEMATICS PHYSICS
TECHNICAL SCIENCES INFORMATION SCIENCE **11**, 142-147 (2010)

Ultrashort light bullets described by the two-dimensional sine-Gordon equation

H. Leblond and D. Mihalache
Phys. Rev. A **81**, 063815 (2010)

Varieties of stable vortical solitons in Ginzburg-Landau media with radially inhomogeneous losses

V. Skarka, N. B. Aleksic, H. Leblond, B. A. Malomed, and D. Mihalache
Phys. Rev. Lett. **105**, 213901 (2010)

Vortices and ring dark solitons in nonlinear amplifying waveguides

J. F. Zhang, L. Wu, L. Li, D. Mihalache, and B. A. Malomed
Phys. Rev. A **81**, 023836 (2010)
