M. Apostol

Papers in Journal of Theoretical Physics

1. On the low-dimensional solids and their melting
   M. Apostol
   (e-print 9603108, cond-mat@xxx.lanl.gov)

2. A few remarks on the Coulomb potential of the ionic lattices
   M. Apostol

3. Elastic waves in a uniaxial solid
   M. Apostol

4. On the critical condition of fission of a liquid droplet
   M. Apostol

5. On a structural distortion effect in the NMR-spectrum of alkali fullerides
   M. Apostol

6. On a Thomas-Fermi model of "hollow" atom
   M. Apostol
   (e-print 9607002, chem-ph@xxx.lanl.gov)

7. On the structural distortion of the alkali NMR spectrum in Rb3C60 and K3C60
   M. Apostol

8. On the energy spectrum of the C60 fullerene anion
   M. Apostol
   (e-print 9603150, chem-phys@xxx.lanl.gov)

9. On metallic clusters squeezed in atomic cages
   M. Apostol
Some remarks on the two-electron atom
M. Apostol
(e-print 9603008, atom-ph@xxx.lanl.gov)

On defects in solids
M. Apostol

Entropic "sound" in the atmosphere
B.-F. Apostol, S. Stefan and M. Apostol
J. Theor. Phys. 12 (1996) (e-print 9606001, ao-sci@xxx.lanl.gov)

On a non-linear diffusion equation describing clouds and wreaths of smoke
B.-F. Apostol, S. Stefan and M. Apostol

On the empirical foundation of probability
M. Apostol

On certain dimensionality effects in the ideal Bose and Fermi gases
M. Apostol

Specific heat of charged fermions in magnetic field
M. Apostol

Two-dimensional charged bosons in magnetic field
M. Apostol

Fermions in a slab
M. Apostol

Error estimation for the magnetic field in the accelerator magnets
M. Apostol

A new derivation of the WKB approximation
B.-F. Apostol

On the theory of war between "vicious" civilizations
M. Apostol

eta-superconductivity is an unstable pi-superconductivity

36 The basis of the Fermi liquid theory
M. Apostol

37 On the "bosonization" in two and three dimensions
L. C. Cune and M. Apostol

M. Apostol

39 Integrable Systems, Mathematical Physics and Statistical Mechanics
M. Apostol

40 On the Ostwald ripening process
F. Despa and M. Apostol

41 Quasi-classical atoms, ions and atomic clusters
M. Apostol

42 On the self-consistent field of the atoms and Hartree's equations
M. Apostol

43 Building the matter: molecules and chemical bond
M. Apostol

44 Lowest excited electron states in a large atomic cluster
M. Apostol

45 On the atomic binding energy in the Thomas-Fermi model
M. Apostol

46 Comment on "Breakdown of Bohr's correspondence principle"
M. Apostol

47 Comment on "Breakdown of Bohr's correspondence principle"
M. Apostol
Comment on "Breakdown of Bohr's correspondence principle"
M. Apostol

Universal geometric forms and magic numbers for homo-atomic metallic clusters
L. C. Cune and M. Apostol

Metallic clusters
L. C. Cune and M. Apostol

Iron-ethylene cluster Fe_{13}(C_2H_2)_6
L. C. Cune and M. Apostol

Some notes on Comment on "Breakdown of Bohr's correspondence principle"
M. Apostol

Ionization potential for metallic clusters
L. C. Cune and M. Apostol

On the atomic binding energy in the Thomas-Fermi model
L. C. Cune and M. Apostol

Effective hamiltonian for the molecular binding
M. Apostol

Metallic cohesion
M. Apostol

On superluminal effects
L. C. Cune and M. Apostol

Research Project on Chemical Bond and Matter Aggregation
M. Apostol

Ultrafast thermoelectric conduction
M. Apostol

The Chemical Bond in Condensed Matter
M. Apostol

61 Seminar on Chemical Bond
M. Apostol

62 Quanta of viscosity
M. Apostol

63 Some remarks on statistical motion
M. Apostol

64 Some remarks on the thermoelements' "figure of merit"
M. Apostol

65 Thermoelectrics
M. Apostol

66 Ultrafast thermoelectric conduction
M. Apostol and M. Nedelcu

67 Pulse-like thermoelectric transport
M. Apostol

68 On pulse-like thermoelectric transport
M. Apostol

69 On pulse-like thermoelectric transport
M. Apostol

70 Transit and delay times in wave propagation
M. Apostol

71 Atomic Clusters, Poznan talk, September 2001
M. Apostol

72 Bose-Einstein condensation and superfluidity
M. Apostol

73 On quantal trajectories and chemical reactivity
M. Apostol
On the rate of the chemical reactions and the teleportation of the wavepackets
M. Apostol

On the Levenberg-Marquardt minimization procedure
M. Apostol

Electric flow through a ferromagnet-superconductor junction
M. Apostol and L. C. Cune

Metallic clusters deposited on surfaces
L. C. Cune and M. Apostol

Atomic clusters and nanostructures
L. C. Cune and M. Apostol

Metallic clusters deposited on surfaces. Puszczykowo Talk 2002
M. Apostol

A critical point theory of the earthquakes
B.-F. Apostol and M. Apostol

Transferring Power to a Resistive External Circuit in a Pulsed
Thermoelectric Conduction
M. Apostol

Metallic Clusters deposited on surfaces
L. C. Cune and M. Apostol

Amplification factors in oscillatory motion
B.-F. Apostol and M. Apostol

Opening talk on the Course of Theoretical Physics, February 6, 2003
M. Apostol

On a non-linear wave equation in elasticity
B. F. Apostol
86  On the cubic anharmonic oscillator
     B. F. Apostol
87  On linear anharmonic oscillators and self-consistent harmonic approximation
     M. Apostol
88  Advanced Materials
     M. Apostol
89  On a non-linear wave equation in elasticity
     B. F. Apostol
     M. Apostol
91  A pulse thermoelectric machine
     M. Apostol
92  Einstein's Physics (Lecture two of the Course of Theoretical Physics)
     M. Apostol
93  On parametric excitations of magnetization under electric flows
     L. C. Cune and M. Apostol
94  On superfluid spectrum of He\(^4\)
     L. C. Cune and M. Apostol
95  An introduction to theoretical seismology
     B.-F Apostol and M. Apostol
96  A few Nanocomments on NanoScience and NanoTechnology
     M Apostol
97  Science and Computations (Lecture three of the Course of Theoretical Physics)
     M Apostol
98  On probabilities (Lecture fourt of the Course of Theoretical Physics)
M Apostol

99  Power-law distributions and avalanche phenomena
M Apostol

100  On distributions with isolated points and a condensation phenomenon
M Apostol

101  “Equivalent circuits” for pulse-operating thermoelements
M Apostol and L C Cune

102  Euler's transform and a generalized Omori’s law
B F Apostol

103  Euler's transform and a generalized Omori’s law
B F Apostol

104  Generalized Omori’s law and a self-generating process
B F Apostol

105  A model of seismic focus and related statistical distributions of earthquakes
B F Apostol

106  Omori’s law for seismic foreshocks and aftershocks
B F Apostol

107  A Bayesian theory for seismic foreshocks and aftershocks
B F Apostol

108  A model of seismic focus and related statistical distributions of earthquakes
B F Apostol

109  Principles of earthquake forecasting. Short-term prediction. Application to Vrancea, Romania
apoma Laboratory

110  Short-term seismic activity. Next-Earthquake Time-Magnitude Distributions
apoma Laboratory

111  Scaling and universal power laws
apoma laboratory

112 Scaling and universal temporal distribution of nearest-neighbours pairs of earthquake
M Apostol

114 Kepler's problem
M Apostol

115 A three-body problem: the Sun, the Earth and the Moon
M Apostol

116 A peculiar motion in Coulomb potential and a new route of quantizing the Hydrogen atom
M Apostol

117 Moon's problem. A three-body problem. (Lecture five of the Course of Theoretical Physics)
M Apostol

118 Theory of perturbation for a three-body gravitational bound-state
M Apostol

119 Scaling and universal power-laws in time series of seismic events
M Apostol

120 Moon's problem. (A three-body problem). An investigation into “intractability” and “uncomputability” in Theoretical Physics
M Apostol

121 Principles of Earthquake Forecasting. Short-term prediction. Application to Vrancea
M Apostol

122 Hadronization of the quark-gluon plasma
M Apostol

123 The condensation of matter. A model of phase transition of the first kind.
On the thermodynamics of classical liquids
M Apostol

On the thermodynamics of liquids
M Apostol

On the thermoconductivity of liquids, their fluctuations, viscosity and diffusion coefficient
M Apostol

On the van der Waals equation
L C Cune and M Apostol

Elastic scattering in short-range potentials (Lecture six of the Course of Theoretical Physics)
M Apostol

Elastic scattering in short-range potentials
M Apostol

Bound states in short-range potentials
M Apostol

Coulomb scattering
M Apostol

Nuclear cohesion. Weizsacker mass formula and statistical equilibrium in atomic nuclei
M Apostol

Inelastic collisions
M Apostol

On composite particles in relativistic mechanics, asymptotic freedom and nuclear forces
M Apostol
135 Fluids, fluid vortices and the Theory of Electricity and Magnetism (Lecture seven of the Course of Theoretical Physics)
M Apostol

136 On some experimental observations of quantal beats in positronium two-gamma annihilation in magnetic field
M Apostol

137 On a possible coupling between ortho- and parapositrionium
M Apostol

138 On the effect of the magnetic interactions on the gamma disintegration of the orthopositronium
M Apostol

139 Weber's coherent scattering and neutrino detection
M Apostol

140 Quantal transitions by change of parameters and in non-inertial motion (Lecture eight of the Course of Theoretical Physics)
M Apostol

141 Twins paradox
M Apostol

142 Quantal transitions by change of parameters and in non-inertial motion
M Apostol

143 A few notes on the theory of motion (Lecture nine of the Course of Theoretical Physics)
M Apostol

144 Another note on relativistic bound states and composite particles
M Apostol

145 Whether dynamics
S Talpos and M Apostol
On the Yang-Lee theory of condensation and phase transitions
M Apostol

The condensation of matter. A model of phase transition of the first kind
M Apostol

On the thermodynamics of liquids
M Apostol

On the gas-liquid transition
M Apostol

Covariance, curved space, motion and quantization (Lecture ten of the Course of Theoretical Physics)
M Apostol

Hadronization of the quark-gluon plasma
M Apostol

The many-body theory. Its logic along the years (dedicated to the memory of O. Dumitrescu)
M Apostol

A short overview of Physics (Lecture eleven of the Course of Theoretical Physics)
M Apostol

Elementary comments on unitary transformations
M Apostol

Magnetostatic modes excited by spin-transfer torques. The case of a spin valve
M Apostol

Resonance of the surface waves. The H/V ratio
B F Apostol

Waves with defects
M Apostol

158 A power law spectral line
M Apostol

159 Electrical conductivity for localized electrons
M Apostol

160 A new derivation of some properties of the orbital motion
M Apostol

161 Pulsed thermoelectric machine
M Apostol

162 On some diffraction problems for a scalar wave
M Apostol

163 Elastic waves on a surface with irregularities
B F Apostol

164 On high electric and magnetic pulses
M Apostol and G. Vacca

165 On quantized electrical conductance
M Apostol

166 Density oscillations in a model of water and other similar liquids
M Apostol and E Preoteasa

167 Density oscillations in a classical multi-component plasma
M Apostol

168 Density collective oscillations and single-particle excitations in an ensemble of interacting identical particles
M Apostol

169 Density oscillations in multi-component molecular mixtures
M Apostol

182  Plasmons, polaritons and diffraction of the electromagnetic field in cylindrical geometries  
M Apostol and G Vaman  

183  Plasmons and diffraction for a circular aperture and a circular disk  
M Apostol  

184  Elastic waves produced in a semi-infinite body by localized external forces  
B F Apostol  

185  On the trajectories of the seismic rays  
C Ciucu  

186  Polaritonic pulses of laser transported electrons  
M Apostol and M Ganciu  

187  Relativistic polaritons: on plasma electrons accelerated by laser pulses  
M Apostol  

188  On a lasing effect controlled by high external electromagnetic fields  
M Apostol and M Ganciu  

189  Coherent polarization driven by external electromagnetic fields  
M Apostol and M Ganciu  

190  On the current theory of lasers  
M Apostol  

191  On the classical interaction of matter with electromagnetic radiation  
M Apostol  

192  Classical interaction of electromagnetic radiation with two-level polarizable matter  
M Apostol  

193  Dynamics of electron-positron pairs in a vacuum polarized by an external field  
M Apostol  

16
Coherent X- and gamma rays from Compton (Thomson) backscattering by a polaritonic pulse
M Apostol and M Ganciu

Polaritonic pulse and coherent X- and gamma rays from Compton (Thomson) backscattering
M Apostol and M Ganciu

Coherent X- and gamma rays from Compton (Thomson) backscattering by a polaritonic pulse
M Apostol and M Ganciu

Magic pairs and structural transitions in binary metallic clusters
L C Cune

Non-inertial electromagnetic effects in matter. Gyromagnetic effect
M Apostol

van der Waals-London electromagnetic forces involving spherical bodies
M Apostol

The electromagnetic force (van der Waals-London-Casimir force) for spheres, point-like bodies and a half-space
M Apostol

The electromagnetic field in matter
M Apostol

The electromagnetic field of linear, or circular, antennas. The dipole approximation
M Apostol

Elastic waves in a solid with a rough surface
B F Apostol

Scattering of longitudinal waves by a rough surface
B F Apostol
J. Theor. Phys. 204 (2011)

Scattering of longitudinal waves (sound) by small inhomogeneities in a fluid
B F Apostol

206 On the molecular forces acting between macroscopic bodies
M Apostol

207 On the molecular forces acting between macroscopic bodies
M Apostol

208 Electromagnetic reflection and efraction for a semi-infinite solid with a rough surface
B F Apostol

209 Antennas and fields
M Apostol

210 Dynamics of laser pulses in plasma
M Apostol

211 Molecular forces acting between macroscopic bodies
M Apostol

212 Propagation of electromagnetic pulses through the surface of dispersive bodies
M Apostol

213 Reading Brillouin
M Apostol

214 Coupled nanoplasmons
M Apostol, S Ilie, A Petrut, M Savu and S Toba

215 Electromagnetic field in matter. Surface enhanced Raman spectroscopy
M Apostol, S Ilie, A Petrut, M Savu and S Toba

216 A resonant coupling of a localized harmonic oscillator to an elastic medium
B F Apostol

217 On the allosteric and related kinetics
M Apostol

218 Finite chains
219 Electronic edge states in graphene sheets
Oana-Ancuta Dobrescu and M Apostol

220 Some relativistic notes
M Apostol

221 On the frequency shift of piezoelectric sensors and associated damping of the signal
B F Apostol

222 On the phase diagram of Quantum Chromodynamics
M Apostol

223 Coupling of (ultra-) relativistic atomic nuclei with photons
M Apostol and M Ganciu

224 QCD
M Apostol

225 On the damping coefficient of oscillators and waves
B F Apostol

226 A note on the time evolution of the waves
B F Apostol

227 Quasi-classical dynamics in condensed matter
M Apostol

228 Parametric dipolar resonance
M Apostol

229 Parametric resonance in molecular resonance spectra
M Apostol

230 Giant dipole oscillations and ionization of heavy atoms by intense electromagnetic fields
M Apostol

M Apostol and L C Cune

M Apostol

M Apostol

M Apostol

M Apostol and L C Cune

M Apostol

M Apostol

M Apostol

M Apostol

M Apostol

M Apostol
242 Deformation of an isotropic elastic half-space under the action of point forces. General solution
B F Apostol

243 Vibration eigenfrequencies of a homogeneous elastic sphere with large radius
B F Apostol

244 Preliminary tremor, main shock and the "tail" produced by earthquakes on Earth's surface
B F Apostol
J. Theor. Phys. 244 (2016)

245 On the Lamb problem. Forced vibrations of an isotropic elastic half-space
B F Apostol

246 Electric charges in high-intensity laser fields
M Apostol

247 Non-relativistic electric charge in electromagnetic field
M Apostol

248 On the measurement process in Quantum Mechanics
M Apostol

249 Preliminary tremor, main shock and the seismic tail produced by earthquakes on Earth's surface
B F Apostol

250 Other few remarks on the motion. Vibrations of macroscopic ensembles of particles (Lecture twelve of the Course of Theoretical Physics)
M Apostol

251 On the role of boundary conditions in the wave motion propagated in semi-infinite solids and fluids
M Apostol

252 Normal modes and coupled harmonic oscillators in structural engineering, the model of the embedded bar and amplification factors
B F Apostol

253 Elastic waves interacting with a plane surface
B F Apostol

254 Singular solutions of the wave equation: a model description of the tsunami phenomenon
M Apostol

255 Ten naive commentaries of the non-expert layman M. Apostol on the Seismological Problem
B F Apostol

256 On unphysical terms in the elastic Hertz potentials
M Apostol

257 On the boundary conditions in fluids
M Apostol

258 Vibrations of fluids
M Apostol

259 On the Landau damping and the penetration depth in a plasma model (Lecture thirteenth of the Course of Theoretical Physics)
M Apostol

260 Penetration depth of a longitudinal electric field in a semi-infinite classical plasma
M Apostol

261 On the solar neutrino problem
M Apostol

262 Damping (reaction) force for a charge in high-intensity radiation field
M Apostol

263 On the Stokes problem and its tensorial generalization in the theory of the elastic waves
B. F. Apostol

264 Secondary elastic waves from the plane surface of a half-space
B. F. Apostol
265. Of longitudinal fields in Electromagnetism
M. Apostol

266. On the stability of a classical plasma
M. Apostol and L. C. Cune

267. Ions "diffracted" on electromagnetic radiation
M. Apostol

268. A note on the electromagnetic interaction. Radiation-induced fragmentation (dissociation) of quantum-mechanical assemblies
M. Apostol

269. On the ionization of atoms by electromagnetic radiation
M. Apostol

270. Ions diffracted by electromagnetic radiation. Charges scattered by radiation field
M. Apostol

271. Scattering of non-relativistic quantum charge in electromagnetic radiation
M. Apostol

272. Scattering of non-relativistic charged-particles by electromagnetic radiation
M. Apostol

273. A note on the ionization of atoms by electromagnetic radiation
M. Apostol

274. Scattering of non-relativistic charged particles by electromagnetic radiation
M. Apostol

275. Some comments on the bound-state disintegration by electromagnetic radiation (electromagnetic effect on the alpha decay)
M. Apostol

276. Spectral line of stimulated emission in magnetic resonance
M. Apostol
277. Excited states of heavy atoms
M. Apostol

278. The inverse problem in Seismology. Seismic moment and energy of earthquakes
B. F. Apostol

279. Seismic moment deduced from quasi-static surface displacement in seismogenic zones
B. F. Apostol

280. Comments upon bound-state charges in electric fields
M. Apostol

281. On the field-assisted emission of protons from the nuclei of the heavy atoms
M. Apostol

282. Analysis of the cross-section of charge scattering by electromagnetic radiation
M. Apostol and L. C. Cune

283. Two notes on ferroelectricity
M. Apostol

284. Dynamics of the electron cloud of heavy atoms in an external electric field
M. Apostol

285. Derivation of the seismic moment from seismic waves
B. F. Apostol

286. High-intensity laser radiation on solid targets
M. Apostol

287. Energy distribution in ionization and dissociation
M. Apostol

288. Black quanta. On the thermodynamics of the black holes
M. Apostol

289. On the ringing of the bells
290. On the van der Waals equation
   M. Apostol

291. Quasiclassical transition probabilities
   M. Apostol

292. A note on plasma
   M. Apostol

293. Qualitative features of the seismic waves on Earth’s surface
   B. F. Apostol

294. Seismic source parameters from local seismic records. Earthquake of…, Vrancea, Roamnia
   B. F. Apostol and L. C. Cune

295. On an inverse problem in elastic wave propagation
   B. F. Apostol
